Subject: Proposed Microsoft/D.of J. settlement

To whom it may concern:

I strongly object to the proposal that Microsoft be allowed to donate computers and software to schools in exchange for the settlement of the antitrust suit against them. While on the surface the proposal appears to have merit, it should be noted that the education market is one of the few areas where Microsoft does not dominate. To allow them to strengthen their presence in schools constitutes a reward, not a punishment! Microsoft must pay a real penalty for their unfair and predatory business practices!
